	Examiner Jesús D. Sotelo	Art Unit 3617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1, 3-14 and 16 are in the application. Claims 2 and 15 have been canceled.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4, 7-9, 11-14 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 3, the alternative phrase “”open at one or both of the toes and heel” makes this claim indefinite.

In claim 7 the alternative phrases “at one or both a toe region or an arch region” make this claim indefinite for the metes and bounds of the claim are not well defined.

In claim 9, line 2, there is no proper antecedent for “said tuning webs”.

In claim 16, the alternative phrases in lines 1 and 2 make this claim indefinite.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3617

5. Claims 1, 3 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schmitz (2,729,832) in view of Tomlinson 4,787,871).

Schmitz discloses, with reference to figure 4, a swimming aid including a body portion (1) having locating means for the foot of the user and further including a flexible web 6 extending laterally from the body portion and a series of ribs disposed on the flexible web and extending laterally from the body. Tomlinson discloses a similar swimming fin including a foot portion and a web portion having a series of ribs. Tomlinson teaches making the ribs segmented to allow flexing in one direction and limiting flexion above the plane of the body portion. In view of these disclosures, it would have been obvious to one skilled in the art to make the ribs in Schmitz as being segmented to increase the flexibility in one direction and limiting flexibility in the opposite direction, generally as taught by Tomlinson. Considering that the power stroke of the fin is away from the body, it would have been desirable to limit flexibility in the power stroke; this would make it desirable to provide more stiff ribs on the web as taught by Tomlinson. Tomlinson also teaches making the foot enclosing portion 14 as fully enclosing the user's foot. In view of these disclosures, it would have been obvious to one skilled in the art to make the foot retaining portion of Schmitz as fully enclosing the user's foot generally as taught by Tomlinson.

Allowable Subject Matter

6. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
